SPONSORSHIP PROPOSAL

ABOUT HELLO WORLD HACKS

Hello World Hacks is a 24-hour online hackathon aimed at fostering innovation, collaboration, and technical skill development among students. The event is organized by GDGC RCCIIT and RCCTechz, two leading technical communities at RCC Institute of Information Technology. Our goal is to create an inclusive, supportive, and empowering environment for students to explore technology and problem-solving through real-world applications.

WHAT?

Hello World Hacks is a month long online hackathon that provides students with a structured platform to develop and showcase innovative solutions. Participants will work in teams, receive expert mentorship, and engage in technical workshops to enhance their skills.

WHY?

We aim to break down barriers to hackathon participation by offering preparatory sessions, structured mentorship, and an inclusive environment.

This hackathon will:
- Bridge the gap between theoretical knowledge and practical application.
- Help students build their professional portfolios with real-world projects.
- Develop technical communication and presentation skills.
- Foster a self-sustaining innovation culture at RCCIIT.

FOR WHOM?

This event is open to students of all skill levels, from beginners to experienced developers. Whether you're interested in frontend development, AI/ML, DevOps, or cloud computing, Hello World Hacks provides the perfect opportunity to learn, experiment, and innovate.

WHY SPONSOR US ?

HWH
HELLO WORLD HACKS

Partnering with Hello World Hacks provides companies and organizations with a unique opportunity to:

- Engage with top talented student from RCCIIT and beyond.
- Brand visibility across the hackathon's promotional materials, social media, and event sessions.
- Network with future innovators and potential interns/employees.
- Showcase your company's expertise in technology and innovation.
- Promote community-driven technical education and skill enhancement.
